

**BENDHEIM**

SINCE 1927

**EchoMirror® Glass**

EchoMirror® is a new architectural safety glass offering great design flexibility. The dual-surface, laminated glass — exclusive to Bendheim — is available in a variety of luminous patterns, surface textures, and colors. It is well-suited for a wide array of corporate and residential applications, including wall coverings, room partitions, and doors.

Bendheim, the resource for specialty glass since 1927, offers more than 2,000 decorative architectural glass types in stock and unlimited custom design solutions.

**EchoMirror® was developed for architects and designers desiring an opaque material with luminous properties. Its front and back surfaces can be identical or completely different. The mirrored surface is protected between the layers of glass, creating an extremely durable, easy to install product.**

Bendheim's EchoMirror® glass is a true laminated safety glass. It can be supplied in a wide array of patterns and color options. EchoMirror® allows for two distinct aesthetics – one on each side of its dual surface. The internal mirror coating is fully protected by lamination. Unlike traditional mirror-backed glasses, EchoMirror® can be applied to wall surfaces using structural silicone adhesives and will not blacken or discolor over time. EchoMirror® is easy to maintain and offers great design flexibility with its unlimited number of aesthetic options and large sheet sizes, up to 72 by 120 inches. EchoMirror® can be provided in thicknesses ranging from 0.25 to 1 inch.

**EchoMirror® Specifications:**

|                        |   |
